

DIRECTOR OF CENTRAL INTELLIGENCE
Security Committee

SECOM-D-182

14 April 1980

MEMORANDUM FOR: Chief, Policy and Plans Group, OS
FROM:
Deputy Director for Community Affairs
SUBJECT: Revision of DCIDs

1. This responds to your request for my views on proposed revision of the entire DCID series. I see no objection to such revision from the standpoint of the Director of Security.

2. There are seven DCIDs under the cognizance of the Security Committee. Two of them are current. Draft revisions of two others have been staffed to the NFIB and are awaiting action by nonsecurity components. Two more are contingent on developments expected under the new APEX single system of compartmentation. The remaining one may need revision dependent on the results of and Community reaction to a survey and conclusion on personnel security investigations. Specifics on these DCIDs are attached. The charters of two other DCI Committees - SIGINT and COMIREX - are expressed in other DCIDs which include security responsibilities. We believe that implementation of the APEX system will result in those stated responsibilities being revised so as to be fully complementary to those assigned to the Security Committee.
